

WeatherMAXTM

Coated

WeatherMax Coated an excellent alternative for Acrylics. With the special coating WeatherMax is now waterproof with a water column of 1300mm.

WeatherMax Coated is woven with SaturaMax yarn. This is a solid pigment, solution dyed polymer yarn. This ensures the highest quality coloured yarn is produced. As the colour is physically part of the polymer yarn itself, it offers superior colour consistency, light fastness and strength characteristics. WeatherMax quite simply outperforms the competition. It has twice the strength of acrylic and is six times more durable under abrasion and rubbing.

The many years of experience with sailcloth finishing at KBC has resulted in a very durable coating. The high quality coating hasn't influenced the very soft hand we are used to with the uncoated version of WeatherMax. The fraying of the cloth when cut with knife or scissor belongs to the past, thanks to the durable coating.

WeatherMax Coated has a long life, very good UV properties, fade resistance and an anti-mildew treatment.

WeatherMax Coated	
weave	Ottoman
yarn	SaturaMax
weight (gr/m²)	DIN EN 12127 298
Water column	DIN EN 20811 1300mm
Water repellancy	AATC-22 Spray test Note 90
Tensile strength	DIN EN 13934-1 warp 180 daN/5cm fill 175 daN/5cm
Tear resistance	DIN EN 13937-2 warp 45 N fill 45 N
Colour fastness	DIN EN ISO 105-B02 Note >6
Seawater fastness	DIN EN ISO 105-E02 Note 5
length roll	50m
Width	150 cm

The data in the table above are based on our present knowledge and experiences. They do not release the user of the fabrics because of possible influences with processing and application of our product from their own examinations and trails. Application, use and processing of the products take place outside of our controllability and exclusively lie from there in your area of responsibility.

Go the extra mile!
